

Wild About

Numbers!

This is a fun math pack that will take your kiddos from number identification all the way through addition and subtraction using dice.

The first two sheets work on identifying numbers. You can stick with the numbers 1-6 on the dice, or you can have the kiddos count the roll (2 dice) and write those numbers.

The last two sheets are for adding and subtracting. The kiddos can roll and add the two numbers OR copy in the starting number and the kiddos roll to see what number to add.

*pre-copy *9* in every 1st box, then every problem is $9 -/+ \underline{\quad} = \underline{\quad}$ ☺

This pack can be used independently, small group, cooperative learning or whole group.

Extension:

Odd / Even - roll dice, write the number and write whether it is odd or even.
